

Polydoros Giannouris

E-mail: polydoros.giannouris@manchester.ac.uk

Website: polydorosg.github.io

EDUCATION

- | | |
|---|--------------------------|
| 2. University of Manchester , Manchester, UK | 10/2024 – Present |
| <i>PhD in Computer Science</i> | |
| 1. Aristotle University of Thessaloniki , Thessaloniki, Greece | 10/2018 – 07/2023 |
| <i>M.Eng. in Electrical & Computer Engineering (5-year integrated Master's)</i> | GPA: 9.00/10.00 (Top 1%) |

RESEARCH EXPERIENCE

- | | |
|---|---------------------------------------|
| 3. University of Manchester , Manchester, UK | 10/2024 — Present |
| <i>Supervisor: Prof. Sophia Ananiadou</i> | |
| PhD Student | |
| <ul style="list-style-type: none">- Conducting research on large language models (LLMs), multimodal NLP, and agentic systems for model-based software and systems engineering, as well as AI applications in high-risk domains (sponsored by BAE Systems).- Conducting research on financial LLMs and agentic financial intelligence, including Greek financial NLP, multilingual and multimodal financial benchmarking, and language-driven reinforcement learning for trading. | |
| 2. AIIA CVML R&D Group, AUTH , Thessaloniki, Greece | 10/2022 – 09/2024 |
| <i>Researcher</i> | Supervisor: Prof. Ioannis Pitas |
| <ul style="list-style-type: none">- Developed lightweight emotion-interrelation mechanisms for multi-label text emotion detection, improving binary-relevance models in supervised and few-shot domain-adaptation settings.- Led the integration of the sentiment-analysis module for the Horizon Europe TEMA project.- Collaborated with international project partners on integration and testing of TEMA's core infrastructure, including on-site work at the University of Messina.- Contributed to system design, technical specifications, and implementation of AUTH's sentiment-analysis components. | |
| 1. Diploma Thesis, AUTH , Thessaloniki, Greece | 11/2022 – 07/2023 |
| <i>Plain-Language Summarisation of Clinical Trials</i> | Supervisor: Prof. Grigorios Tsoumakas |
| <ul style="list-style-type: none">- Created CARES, the first dataset for automatic plain-language summarisation of clinical-trial results.- Developed methods for selecting relevant source information from long clinical-trial documents.- Evaluated state-of-the-art summarisation models and analysed sources of factual errors and hallucinations. | |

TEACHING EXPERIENCE

- Teaching Assistant, **Natural Language Understanding**, University of Manchester.
- Teaching Assistant, **Fundamentals of Computer Engineering**, University of Manchester.
- Mentored one Master's thesis student and two undergraduate students on research projects in Natural Language Processing.
- Delivered a lecture on NLP for political text analysis at the "e-Symposium on Computational Politics 2023."
- Delivered a lecture and practical workshop on NLP for natural-disaster management at the "CVML Programming Short Course and Workshop on Deep Learning and Computer Vision 2023."

SKILLS

- **Programming:** Python (PyTorch, Hugging Face, spaCy), C, C++, MATLAB, Java
- **Languages:** Greek (Native), English (C2), German (B2)
